

Inspections, Inspections, Inspections...Put an Added Pin into Your Attribute Stack

Joe Madej - Seiler Instrument & Mfg

10:30 - 11:20 am

Bio:

Joe is a member of the Seiler Instrument Mapping Technical Support team in St Louis, MO. He serves in technical support and a Certified Trimble trainer of both Trimble mapping hardware and software. Prior to Seiler, Joe has spent his 13 year GIS career working on Federal and Local Government projects, rural water line mapping, and field data collection. Joe holds a Bachelor's degree in Science with an Area of Specialization in GIS from Southern Illinois University Edwardsville. He also holds his GIS Professional Certification.

Abstract:

Inspections, Inspections, Inspections...put an added pin into your attribute stack

-Inspections are an everyday part of life. We use these to make sure the vehicles we travel in are safe and make sure our bodies are healthy. As geospatial professionals we should also inspect our existing spatial data to maintain its health and accuracy. In this abstract we will discuss how to use ESRI Collector and Survey123 together to update and inspect data live in the field.
